

NEUROSCIENCE RESEARCH

Products for Primary
and Pluripotent Stem Cell-
Derived Neural Workflows

Pluripotent Stem Cell Workflows

2D Cell Culture

Successful Differentiation Begins with High-Quality hPSCs

Start your human pluripotent stem cell (hPSC) workflows with confidence. Begin with the SCTi003-A cell line for a reliable source of high-quality hPSCs. Cryopreserved Human iPSC-Derived Neural Progenitor Cells, derived from the high quality SCTi003-A cell line, allow you to start your workflows with a highly characterized neural progenitor intermediate. Looking to speed up your research? iPSCdirect™ is a ready-to-use, single-cell solution that eliminates the need for developing, maintaining, and characterizing hPSC banks.
